Customized Traffic Action Plan for 88th St SW

Education, Encouragement, and Enforcement

By educating the community and encouraging safe driving, we can begin to change driver behavior and reduce vehicle speeds.

Speed Limit Pavement Markings

The City uses pavement markings noting the posted speed limit at locations where drivers may need to be reminded of the posted speed limit. The pavement markings are typically 8 feet long.

Neighborhood Speed Watch Programs

The Neighborhood Speed Watch is a public awareness program that provides citizens with partnership opportunities in solving speeding problems in their neighborhood. Residents can monitor the actual speed of vehicles with radar equipment on loan from the Police Department. A short 1 hour training session is provided to the requestor by City staff. The requestor collects motorists' data and submits the

Police volunteers are also trained to utilize portable radar equipment where they can record the license plate numbers of those motorists driving at least 5 mph above the posted speed limit. A letter is sent from the Police Department to the registered owners of those vehicles informing them of the observed violation and encourages them or the other drivers of their vehicle to drive at or below the posted speed limit. Since this is a community awareness program, no formal citations or fines are issued.

Radar Trailer/Dolly

The radar trailer/dolly is a portable trailer equipped with a radar unit which detects the speed of passing vehicles and displays the speed on a reader board. The goal is to heighten driver's awareness of both the speed at which they are traveling and the posted speed limit. This encourages drivers to adjust their speeds, if needed.

Police Officers or Police Volunteers will place the radar trailer or dolly at location as requested. The Police Department may use the trailer as a "speed checkpoint" and have an officer present to issue citations to violators.

Traffic Action Plan

City of Mukilteo Traffic Calming Program

June 11, 2021

Re: Speeding Concerns on 88th St SW

Dear Tom,

Thank you for contacting the City of Mukilteo and sharing your concerns with vehicle speeds on 88th St SW. We have completed a field review and data analysis and compiled this information into this Traffic Action Plan (TAP), as well as our recommendations.

A speed study was conducted on the stretch of 88th St SW between SR 525 and 44th Ave W. The location was selected to capture the highest speeds possible based on the information you provided in the Request for Action form. The speed study began on April 26, 2021 and ended on May 10, 2021. The study shows 85% of motorists are traveling at or below 33.0 mph in the eastbound direction and at or below 32.0 mph in the westbound direction. The average daily traffic traveling in the eastbound direction was 271 vehicles, and 151 vehicles traveling in the westbound direction during the 14 day speed study.

One of the pieces of information that is used in the City's traffic calming program is 85th percentile speeds. The 85th percentile speed is the speed at which 85% of the traveling speed is traveling at or below. This speed is important because it is the speed that the nationally recognized Manual for Uniform Traffic Control Devices recommends be used for setting speed limits. Based off the 85th percentile speed and traffic volumes shown in the traffic study, the City has prepared a Traffic Action Plan.

- The Police Department has added this location to the extra patrol list for additional traffic emphasis patrols.
- The City will install speed limit pavement markings on 88th St SW this Summer.
- Additional traffic calming measures are suggested on page 3 which the neighborhood is encouraged to participate in.

Again, thank you for sharing your concerns with us. We look forward to working with you and your neighbors on the programs suggested to address your traffic concerns. Please feel free to contact Connie Bowers connieb@mukilteoowa.gov or 425.263.8080 regarding any of the information in this TAP.

Sincerely,

Andrea Swisstack (Jun 14, 2021 18:13 PDT)

Andrea Swisstack, P.E.
Director of Public Works/City Engineer

Cheol Kang
Police Chief
