Geotechnical Engineering Study, ES-7975, updated July 28, 2022

Kindred Hydro
Harbor Grove Development Hydrologic Impacts Assessment
Job No. SEA-23-1, dated April 19, 2023

Dear Mr. Belew:

As requested, ESNW has prepared this letter for the proposed project. ESNW prepared the referenced geotechnical engineering study for the proposed project which satisfies the “soils report” requirement of Mukilteo Municipal Code (MMC) 15.16.050.C.2.b.i.(a), and reviewed the referenced document by Kindred Hydro which satisfies the “hydrologic report” requirement of MMC 15.16.050.C.2.b.i.(b). With these reports submitted as part of the overall project package, it is our opinion that the “slope report” requirement of MMC 15.16.050.C.2.b.i. is satisfied.

We trust this letter meets your current needs. Should you have questions regarding the content herein, or require additional information, please call.

Sincerely,

EARTH SOLUTIONS NW, LLC
