

Location of Speed Study

Summary of Findings

Date	Location	Average Daily Traffic	Average Speeds	85% of vehicles traveling at or below this speed
January 28— February 12, 2016	Loveland/8th Drive, near 11th Street Southbound	594	24 MPH	28 MPH
January 28— February 12, 2016	Loveland/8th Drive, near 11th Street Northbound	414	22 MPH	27 MPH

Customized Traffic Action Plan for Loveland/8th Drive/Goat Trail

Education, Encouragement, and Enforcement

By educating the community and encouraging safe driving, we can begin to change driver behavior and reduce vehicle speeds.

Traffic Enforcement

The Public Works Department works closely with the Police Department to enforce speed limits and other traffic laws in neighborhoods. Using key traffic data provided by Public Works staff, officers focus their scheduled patrols on the times and places where speeding most often occurs. Typically, targeted enforcement occurs during a one-week timeframe. Enforcement is also available by request to Mukilteo residents.

Neighborhood Speed Watch Programs

The Neighborhood Speed Watch is a public awareness program that provides citizens with partnership opportunities in solving speeding problems in their neighborhood. Residents monitor the speed of vehicles with radar equipment on loan from the Police Department. Police staff train residents on how to use the radar unit to record the license plate numbers of those motorists driving at least 5 mph above the posted speed limit. A letter is sent from the Police Department to the registered owners of those vehicles informing them of the observed violation and encourages them or the other drivers of their vehicle to drive at or below the posted speed limit. Since this is a community awareness program, no formal citations or fines are issued.

A short 1 hour training session is provided to the requestor by City staff. The requestor collects motorists' data and submits the results to City Staff. To participate in this program, please call 425.263.8100.

Radar Trailer/Dolly

The radar trailer/dolly is a portable trailer equipped with a radar unit which detects the speed of passing vehicles and displays the speed on a reader board. The goal is to heighten driver's awareness of both the speed at which they are traveling and the posted speed limit. This encourages drivers to adjust their speeds, if needed.

Police Officers or Police Volunteers will place the radar trailer or dolly at location as requested. The Police Department may use the trailer as a "speed checkpoint" and have an officer present to issue citations to violators.

To request a radar speed trailer be placed at a particular location, call 425.263.

My Action Plan for Loveland/8th Drive/Goat Trail

Are you feeling inspired to take action to address the traffic concerns on Loveland/8th Drive/Goat Trail?

Here is a checklist to help you get started:

Talk to my neighbors and share the City's findings and recommendations

Re: Speeding Concerns on Loveland/8th/Goat Trail

Dear Kristin,

Thank you for contacting the City of Mukilteo and sharing your concerns with vehicle speeds on Loveland/8th/Goat Trail. We have completed a field review and data analysis on Loveland/8th and compiled this information into this Traffic Action Plan (TAP), as well as our recommendations.

A speed study was conducted along Loveland/8th near the top of the hill at 11th. The location was selected to capture the highest speeds possible. The speed study began on January 29, 2016 and ended on February 12, 2016. The study shows 85% of motorists are traveling at or below 28mph in the southbound direction and at or below 27 mph in the northbound direction. There were 8,878 vehicles recorded traveling southbound, and 6,182 traveling northbound during the 16 day speed study.

The speed study was provided to the Mukilteo Police Department, who will be conducting additional traffic enforcement in this area as part of their traffic enforcement emphasis areas.

To address those motorists choosing to drive faster than the posted speed limit, we encourage you and your neighbors to participate in one of our education programs as described on page 3 of this report. One of the options that would work well for the situation you described is to request a radar trailer/dolly be placed along 8th Drive/Loveland/Goat Trail Road. To request this please call 425.263.8100.

Again, thank you for sharing your concerns with us. We look forward to working with you and your neighbors on the programs suggested to address your traffic concerns. Please feel free to contact Challis Stringer at cstringer@mukilteowa.gov or 425.263.8082 regarding any of the information in this TAP.

Sincerely,

A handwritten signature in blue ink, appearing to read "Robert McGaughey".
