

CONSTRUCTION UPDATE

76th St. SW & SR525 Pedestrian Improvements Project

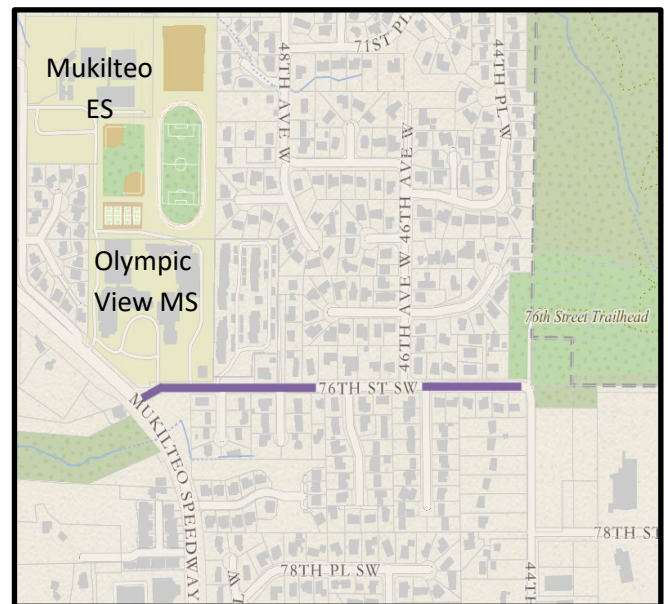

Starting in August through December 2021, the City of Mukilteo is constructing new sidewalks, pedestrian signals and ADA facilities along 76th St. SW between the Mukilteo Speedway and 44th Ave W.

These improvements will better serve the adjacent residential neighborhoods, Olympic View Middle School, Mukilteo Elementary School, the Mukilteo Community Garden and the Japanese Gulch South Trailhead.

Project Description

This project will:

- construct new sidewalk to fill in the gaps in the existing sidewalk along the north side of 76th PL SW
- repair failed segments of the existing sidewalk
- replace curb ramps within the project limits to bring them into compliance with the Americans with Disabilities Act
- upgrade the existing Olympic View switch-back parking lot ramp that connects to SR525
- replace the existing rectangular rapid flashing beacon (RRFB) crosswalk lights on SR525 with a High-Intensity Activated Crosswalk (HAWK) signal.
- provide a new pedestrian crossing at the east end of 76th St SW and provide a sidewalk connection from this crossing to an existing sidewalk on 44th Avenue W.

What To Expect

The City of Mukilteo has been working closely to keep both Olympic View Middle School and Mukilteo Elementary School well informed of the City's project and schedule of operations. Commuters and pedestrians can **expect most of the construction to be along the north side of 76th St SW**, with a minor portion of the improvements on SR525 just north of the intersection of 76th St SW / SR525. The south side of 76th St SW will remain primarily undisturbed by the construction activities, except for the installation of the RRFB signal and sidewalk connection at the corner of 76th St SW and 44 Ave W. **The contractor will be expected to provide safe access through the construction site for pedestrians**, when necessary. Improvements to the Olympic View School southern driveways, as well as residential driveways along 76th St SW, are expected to be constructed so as to maintain access. Additionally, to minimize disruption to traffic on SR525, night-time work may be necessary to construct the HAWK signal and crossing improvements on SR525, just north of the 76th St SW / SR525 intersection. If night-time work is deemed necessary, residences located near the intersections of Mukilteo Speedway (SR 525), Washington Ave and 76th St SW may hear construction noise associated with the demolition and removal of concrete pavement, signal equipment installation, and from machinery and work vehicles used to perform this work.
