Dear Mr. Jarrell:

Letter of Electric Power Availability

Re: 1,475 sf. commercial space; 14 2-bedroom units above at 823, 2nd Street, Mukilteo

The District presently has enough electric system capacity to serve the proposed development. However, the existing District facilities in the local area may require upgrading. The developer is required to supply the District with suitable locations/easements on all parcels where electrical facilities must be installed to serve the proposed development. It is unlikely that easements will be granted on District-owned property, or consents granted within District transmission line corridors.

Existing PUD facilities may need relocations or modifications at the developer’s expense. Any relocation, alteration or removal of District facilities to accommodate this project shall be at the expense of the project developer and must be coordinated with the PUD in advance of final design. Please include any utility work in the scope of all land-use permits.

Cost of any work, new or upgrade, to existing facilities that is required to connect this proposed development to the District electric system shall be in accordance with the applicable District policy. The developer will be required to supply the District with suitable locations/easements upon its property for any electrical facilities that must be installed to serve the proposed development.

Please contact the District prior to design of the proposed project. For information about specific electric service requirements, please call the District’s Everett office at 425-783-8272 to contact a Customer Engineer.

Sincerely,

Mary Wicklund for
